# WATER POWER ENGINEERING

Second Edition

**M M DANDEKAR**

Ex-Professor

Malaviya Regional Engineering College, Jaipur

**K N SHARMA**

Consultant, Water Resources and Hydro-power

*Formerly*

Secretary, International Commission on Irrigation and Drainage

New Delhi

*and*

Asstt Professor

Malaviya Regional Engineering College, Jaipur

# Contents

*Preface to the Second Edition ix*

*Preface to the First Edition x*

## **1. Extracting Energy from Water 1–26**

*Global Energy Overview 1; Sources of Power and Renewables 6; Global View of Hydro-power Potential 9; Hydro-power: Indian Scenario and Prospects 11; Inter-regional Imbalances 15; Transmission of Power 17; SWOT of Hydro-power 20; Estimation of Hydro-potential 21; Place of Hydro in the Power Mix 22; Multi-purpose Development 22; Climate Change and Hydro-power 23; India's Cooperation with Neighbouring Countries 24; Questions 25*

## **2. Elementary Hydrology 27–42**

*Definitions 27; Branches of Hydrology 27; Hydrologic Cycle 28; Hydrologic Equation 29; Infiltration 30; Evaporation 33; Streams and Stream Flow 36; Statistical Nature of Hydrology 37; Illustrative Examples 39; Questions 41*

## **3. Precipitation 43–63**

*Occurrence and Causes of Precipitation 43; Measurement of Rainfall 44; Interpretation of Rain-gauge Data 51; Graphical Representation of Rainfall 53; Extreme Values of Precipitation 56; Precipitation Patterns in India 59; Illustrative Examples 60; Questions 63*

## **4. Runoff and Stream Flow 64–107**

*Runoff Process 64; Stream Flow Analysis 65; Hydrograph 69; Mass Curve 70; Flow Duration Curve 71; Rainfall–Runoff Relation 72; Factors affecting Runoff 72; Estimation of the Runoff 74; Low Flow Analysis 82; Flood Runoff 83; Unit Hydrograph Method 88; Synthetic Unit Hydrograph 92; Illustrative Examples 95; Questions 106*

<b>5. Electrical Load on Hydro-turbines</b>	<b>108–118</b>
<i>Load Curve 108; Load Factor 110; Power Factor 110; Capacity Factor 111; Utilization Factor 112; Diversity Factor 112; Load Duration Curve 112; Firm Power 113; Secondary Power 114; Prediction of Load 114; Illustrative Examples 115; Questions 118</i>	
<b>6. Low and High Head Plants</b>	<b>119–173</b>
<i>Classification of Plants 119; Run-of-river Plants 123; Valley Dam Plants 130; Diversion Canal Plants 134; High Head Diversion Plants 136; Storage and Pondage 138; Flow- and Power-duration Curves 143; Sedimentation of Reservoirs 144; Illustrative Examples 156; Questions 172</i>	
<b>7. Pumped Storage Power Plants</b>	<b>174–200</b>
<i>Basic Features 174; Historical Development 176; Advantages of Pumped Storage Plants 178; Types of Pumped Storage Plants 179; Reversible Pump-turbines 183; Advantages/Disadvantages of Reversible Pump-turbines 188; Problems of Operation 191; Topography 193; Reservoirs and Water Conveyance 193; The Powerhouse 196; Efficiency of PS Plants 197; Illustrative Examples 198; Questions 200</i>	
<b>8. Dams</b>	<b>201–255</b>
<i>History 201; Functions of a Dam 201; Classification of Dams 202; Selection of Site and Choice of Dams 203; Gravity Dams 205; Embankment Dams 217; Arch Dams 228; Buttress Dams 237; Roller-compacted Concrete (RCC) Dams 239; Concrete-faced Rockfill Dams 241; Rock-filled Concrete (RFC) Dams 244; Inflatable Dams 246; Failures and Safety of Dams 247; Rehabilitation of Dams 249; Multiplier Effect of Dams 249; Illustrative Examples 250; Questions 254</i>	
<b>9. Spillways</b>	<b>256–291</b>
<i>Spillway Design Flood 256; Types of Spillways 257; Spillway Gates 274; Concrete Fuse Plugs 284; Dam Sluices 286; Energy Dissipation Below Spillways 286; Illustrative Examples 288; Questions 291</i>	
<b>10. Penstocks and Accessories</b>	<b>292–319</b>
<i>Classification of Penstocks 292; Design Criteria for Penstocks 297; Economical Diameter of Penstocks 299; Anchor Blocks 303; Conduit Valves 307; Bends and Manifolds 316; Illustrative Examples 318; Questions 319</i>	

<b>11. Water Hammer and Surges</b>	<b>320–345</b>
<i>Water Hammer 320; Resonance in Penstocks 328 Channel Surges 328; Surge Tanks 330; Illustrative Examples 341; Questions 345</i>	
<b>12. Intakes, Canals and Tunnels</b>	<b>346–384</b>
<i>Intakes 346; Air Entrainment at Intakes 357; Canals 359; Tunnels 366; Questions 384</i>	
<b>13. Turbines</b>	<b>385–434</b>
<i>Main Types of Turbines 385; Hydraulic Features 386; Turbine Size 392; Constructional Features of Turbines 392; Layout Arrangements 408; Hydraulics of Turbines 409; Velocity Triangles and Nomenclature 410; Basic Flow Equations 411; Draft Tubes 416; Cavitation in Turbines 418; Abrasion in Hydraulic Machinery 421; Governing of Turbines 422; Turbine Model Testing 426; Characteristics of Turbines 427; Illustrative Examples 428; Questions 434</i>	
<b>14. Electrical and Mechanical Equipment</b>	<b>435–452</b>
<i>Generators 435; Transformers 442; Switchgear 443; Mechanical Equipment 446; Transmission of Electric Power 446; Questions 452</i>	
<b>15. Planning of Powerhouses</b>	<b>453–471</b>
<i>Powerhouse Structure 453; History 461; Location of Underground Power Stations 462; Types of Underground Power Stations 463; Advantages of the Underground Powerhouse 464; Components of an Underground Powerhouse 466; Types of Layout 468; Limitations of an Underground Powerhouse 470; Structural Design of Powerhouses 470; Questions 471</i>	
<b>16. Hydro-power From Oceans</b>	<b>472–512</b>
<i>Energy from Oceans 472; The Tidal Phenomenon 473; Basic Principles of Tidal Power 477; Historical Developments 478; Prominent Sites in the World and in India 479; Modes of Generation 482; Structural Components of Tidal Plants 486; Turbine Assembly and Generation 497; Power Output and Energy from Tidal Barrage 501; Economics of Tidal Power 503; Tidal Power Stations of the World 503; Environmental Effects 505; Illustrative Examples 511; Questions 512</i>	
<b>17. Small-scale Hydro</b>	<b>513–529</b>
<i>Historical Development 514; Sites for Small-scale Hydro 515; Potential of Small-scale Hydro 516; Measures of Economy 517; Choice of Turbines 523; Prospects of Small-scale Hydro 528; Questions 529</i>	

<b>18. Environmental Impact of Hydel and Multi-purpose Projects</b>	<b>530–540</b>
<i>Hydel Projects 530; Data to be Collected/Monitored in a Water Project 536; Positive Impact of Water Projects 537; Possible Negative Impacts 538; Hydro-power and Greenhouse Gases 539; Environmental Laws in India 539; Questions 540</i>	
<b>19. Some Typical Projects</b>	<b>541–582</b>
<i>Beas Project 541; Tarbela Dam Project 545; Idukki Arch Dam Project 550; LA Rance Tidal Plant 552; Revin Pumped Storage Plant 555; Sardar Sarovar (Narmada) Project 557; Tehri Hydro-power Project 565</i>	
<b>Appendices</b>	<b>583–596</b>
I. General Studies and Investigations Needed for Hydro-electric Projects	583
II. Recommended Values of Infiltration Loss Rates	586
III. World's Highest Dams	587
IV. World's Largest Dams	589
V. Largest Man-made Lakes / Reservoirs in the World	590
VI. Load Combinations for Gravity Dams	591
VII. Some Biggest Turbine Installations	592
VIII. World's Largest Hydro-power Plants	594
IX. Some Useful Units	596
<b>Bibliography</b>	<b>597–602</b>
<b>Index</b>	<b>603–610</b>

# Index

- Abrasion 421
- Afforestation 534, 536
- Allievi chart 325, 327
- Alternator 437, 439
- Amplifier 51
- Anchor block 303
  - French method of design 304
  - Swiss method of design 304
  - stability conditions for 305
  - conditions of design of 305
  - forces on 306
- Apparent power 110, 111
- Arch dam 228
  - Types of 229
    - constant radius type 229
    - constant angle type 229
    - variable angle, variable radius type 229
  - multiple 238
  - double curvature 232
  - stresses in 231
  - thin cylinder method 231
  - preliminary design 232
  - modern analysis methods 233
- Area design curves 151
- Area increment method 149
- Artificial neural network (ANN) 80
- Base flow 46, 65, 90
  - separation 90
- Bearings 437
  - thrust bearing 436
  - thrust-cum-guide bearing 437
- Belgium formula 115
- Bends and manifolds 316
- Black box 28
- Boomers 374, 375
- Breaching section 257, 268
- Brune's curve 154
- Bus bars 441, 443, 446
- Buttress dam 237
  - flat slab or Ambursen type 238
  - multiple arch type 238
  - solid-headed type 238
  - cellular or hollow gravity type 238
- Caissons 486, 494, 498, 501, 504
- Calame-Gaden curve 340
- Canal 359, 562
  - intake 347
  - lining of 361
  - surges 362
  - velocity 362
  - automation in 563
- Capacity factor 111
- Catchment characteristics 73
  - shape 73, 74
  - surface 74
  - location 74
  - geology 74
  - topography 74
- Cavitation 191, 193, 312, 315, 417
  - in conduit valve 312, 313
  - in turbines 191, 418
  - parameter (Thoma's) 191, 316

- Churchill's curve 154, 155
- Circuit breakers 443, 444, 446
- Climate change and hydropower 23
- Colorado sunken pan 34, 35
- Computer models 79
- Concrete faced rockfill dams (CFRD) 241
  - face slab thickness 242
  - foundation 243
  - plinth 243
  - parapet wall 244
  - waterstop joints 244
- Condensation 43
- Conductors 449
  - spacing of 448
  - material of 449
- Conduit valves 307
  - types of 308
  - gates 309
  - butterfly valves 310
  - spherical valves 311
  - plug valves 311
  - rotary valves 311
  - needle valves 313
  - plunger valves 313
  - Howell-Bunger valves 314
  - fixed cone valves 314
  - special problems of 315
- Connected load 110, 112
- Control room 445, 454, 457, 466
- Corona 451
- Current meters 67
- Cyclones 43
- Cyclone warning radar 51
  
- Dams 201-250
  - classification of 202
  - function of 201
  - history of 201
  - selection of site for 203
  - safety of 247
  - intakes 348
  - sluices 248, 286
  - rehabilitation of 249
  - multiplier effect of 249
- Deforestation 534
- Depression storage 29
- Depth-area duration curve 56
- Detention storage 29
- Diversity factor 112
- Diversion canal plants 122, 134
  - components of 136
  - various arrangements of 134
  - upstream station layout 135
  - downstream station layout 136
- Draft tube 397, 416
  - elbow type 418
- Drilling 366
  - jumbo 371, 372
  
- Earthen dam 218
  - central core of 223
  - diaphragm type 219
  - drainage in 220, 223
  - equipment for construction of 224
  - failure of 225
  - flow net for 219, 224
  - height of 222
  - homogeneous section 219
  - seepage in 220, 224
  - stability of 225
  - top width of 222
  - u/s and d/s slope in 221, 223
  - zoned section 219
- Echoes 50
- Ecology 536
- Elastic water column theory 323
- Embankment dam 217
- Empirical area reduction method 149
- Energy 1
  - overview 1
  - measurement of 5
  - sources of 6
  - solar 4, 7, 8, 472
  - from oceans 472
- Energy dissipation 286
  - hydraulic jump 286
  - roller buckets 287
  - ski-jump buckets 288
- Environmental 530
  - impacts 505, 531
  - impact assessment (EIA) 531
  - considerations 23, 24

- impact analysis 531
- laws in India 539
- ranking of energy sources 532
- flow 535
- positive impacts 537
- negative impacts 538
- effects of tidal power 505
- Ephemeral streams 65
- Evaporation 30, 33
  - equation 33
  - measurement of 33
  - pans 34, 35
- Evapo-transpiration 29
- Exceedence probability 57, 61
- Excitation 441
- Expansion joint 294, 296, 304
  
- F-average index 32
- Finite element method 234
- Firm (primary) power 113
- Floating pan 34, 35
- Floats 67
- Flood 69, 70
  - probability 84
  - frequency analysis 84
- Flood runoff 83
  - formulae 83, 84
  - flow-duration curve 71, 143
  - calendar year method 143
  - total period method 143
- Flow simulation 77
- Flow velocity 67
- Forebay 365
  - installations in 365
- Frontal meeting 43
- Full reservoir level (FRL) 149, 222, 256
  
- Gauge-discharge 66
  - measurement 66
  - curve 66
- Gates 256, 258
  - conduit gates 309
  - spillway gates 258
  - radial 500
- Generator 435
  - bus bars 441, 443, 460
  - constructional feature 435
  - design features of 439
  - excitation 441
  - horizontal shaft 435, 436
  - lubrication of 442
  - shafts 439
  - ventilation, cooling of 442
  - vertical shaft 436
- Governors 422
  - hydraulic 423
  - mechanical 425
  - electronic 425
  
- Gravity dams 203, 205
  - concrete gravity 206
  - calculation of forces on 207, 208
  - conditions of stability 208
  - elementary profile of 213
  - limiting height of 217
  - middle third rule in 209
  - principal and shear stress in 215
  - structural stability of 207
  - types of 205, 206
- Greenhouse gases 535, 537, 539
  - emissions 535
- Groundwater flow 64
- Gumbel's equation 82, 85
  
- HVDC 18, 451
- Heading and benching method 371
- High head diversion plant 136
  - components of 138
- Hydracone 418
- Hydraulic gradient line 321
- Hydraulic jump 270, 271, 286
- Hydrograph 69, 83
  - of flood 83, 88
  - of complex flood 69
- Hydrologic cycle 28
- Hydrologic equation 29
- Hydrology 27
  - branches of 27
  - stochastic 37
- Hydrometeorology 27
- Hydro-power 9, 11
  - advantages 7, 20

- prospects 11
- place of 22
- SWOT of 20
- potential estimate 9, 21
  - and greenhouse gases 539
- Hydro-power plants 530
  - classification of 119
- Hytograph 69
  
- Idukki project 550
- Infiltration 29, 30
  - capacity 31
  - capacity curve 31
  - index 32
  - $\alpha$ -index 32, 33
- Inflatable dams 246
- Insulators 450
  - pin type 450
  - suspension type 450
  - shackle 450
  - composite 451
  - egg-shaped 451
- Intakes 346
  - air entrainment in 357
  - shaft 352
  - tower 350
  - run-of-river 347
  - canal 347
  - losses in 353
  - types of 347
- Intensity-duration curve 55
- Interception 29, 30, 79
- Interflow 64
- Intermittent streams 65
- Involuntary resettlement 533
- Isochrones 74, 239
- Isolators 443
  
- Joukowsky equation 327
  
- Kilowatt-hour (unit) 2, 4
  
- Lagoons 494, 495
  - artificial 494
- La Rance tidal project 552
- Line insulators 447
  - materials 450
  - types of 450
- Load 110, 112
  - peak load 108, 110
  - mean load 108, 110
  - curve 16, 108
  - factor 110
  - prediction of 114
- Load-duration curve 112
- Load sharing 114
- Locks and fish passages 497
- Low flow 75, 82, 83
  - analysis 68, 82
  
- Mass curve 54, 70, 71, 96
  - of runoff 70, 71
  - of rainfall 54
